

## How to fix 500/5" Create-a-sticker refill

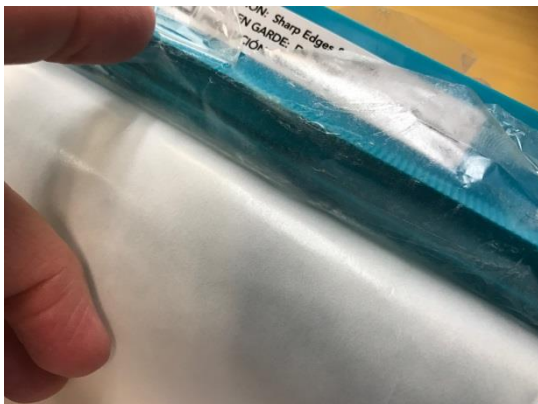

1. Take cellophane from top larger roller and attach to white sticker paper.

2. Pull both thru the large space in back of refill cartridge.

3. Separate the white paper and sticky cellophane.

4. Attach scrap (yellow) paper to sticky cellophane.

5. Pull sticky film and paper thru the opening as shown.

6. Take scrap paper off and wrap film around rollers.

7. Then turn the gear to advance the film around the rollers 2 times, so the film sticks on itself.

8. Then tear up on the white paper.

9. Insert into machine.
